

OURSON DOMINGO

Data Analyst | Python · SQL · R · Tableau | Healthcare & IT Background

San Diego, CA | (619) 829-2785 | oursoncdomingo@gmail.com | chaidend.github.io/PersonalWebsite

SUMMARY

Analytically driven data and operations professional with a B.S. in Mathematics-Computer Science from UC San Diego. Experienced in data analysis, clinical data management, IT support, and high-volume data operations across healthcare and technology environments. Skilled in Python, SQL, R, Tableau, and Excel with a strong foundation in data cleaning, predictive modeling, and visualization. Proven ability to manage complex workflows, communicate findings clearly, and deliver accurate results under pressure. Google Data Analytics and CompTIA A+ certified.

TECHNICAL SKILLS

Languages: Python, R, SQL, Java, JavaScript, LaTeX

Libraries: Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, Tidyverse, Lubridate, Geosphere, BeautifulSoup

Tools: Tableau, Git, GitHub, Epic EMR, Excel, Microsoft Office Suite

Competencies: Data cleaning & EDA, predictive modeling, data visualization, high-volume data entry, workflow coordination, technical support, documentation, process improvement

EXPERIENCE

Office Inc. | IT Support Specialist & Data Operations

2023 – Present

- Built Excel dashboards using pivot tables and VLOOKUP to track inventory trends and operational KPIs, directly supporting data-driven business decisions
- Managed IT asset inventory and equipment lifecycle across multiple business units, identifying hardware failure patterns and recommending process improvements to reduce downtime
- Delivered Tier 1 and Tier 2 technical support to internal and external stakeholders, resolving hardware, software, and network issues in a high-volume environment

Scripps Health | Care Team Assistant (CTA / HUC)

2024 - Present

- Served as the central coordination point for the clinical unit, processing and routing high volumes of orders and documentation with strict accuracy requirements across nursing, physician, and ancillary teams
- Managed high-volume patient data entry and record maintenance in Epic EMR, ensuring accuracy, completeness, and timely processing of orders and clinical documentation under strict compliance standards
- Communicated critical, time-sensitive information accurately and professionally across physicians, nurses, and ancillary departments, supporting real-time clinical decision-making
- Managed multiple simultaneous workflows including admissions, discharges, order tracking, and real-time status updates, consistently meeting daily productivity targets without sacrificing accuracy

PROJECTS

Healthcare EDA: Patient Readmission Analysis | Python, Pandas, Seaborn kaggle.com/code/oursoncdomingo/healthcare-eda-project

Analyzed 100,000+ patient records from 130 hospitals to predict 30-day readmission risk. Engineered 25+ features from clinical data; built a logistic regression model achieving 62% accuracy and 0.62 ROC-AUC via 5-fold cross-validation.

Bike Share Case Study | R, Tableau kaggle.com/code/oursoncdomingo/case-study-bike-share

Analyzed 2.5M+ rides from a Chicago bike-share system to identify behavioral differences between casual and member riders. Built Tableau dashboards mapping destination patterns and developed data-driven recommendations to convert casual riders to members.

EDUCATION

University of California, San Diego

Graduated 2022

B.S. Mathematics - Computer Science | Provost Honors, Spring 2022

CERTIFICATIONS

Google Data Analytics Professional Certificate | Google / Coursera

CompTIA A+ Core 1 & Core 2
